DETAILED ACTION

Election/Restrictions

1. This application is in condition for allowance except for the presence of claims 22-38 and 47 directed to an invention non-elected with traverse in the reply filed on 12 May 2006. Applicant is given ONE MONTH or THIRTY DAYS from the date of this letter, whichever is longer, to cancel the noted claims or take other appropriate action (37 CFR 1.144). Failure to take action during this period will be treated as authorization to cancel the noted claims by Examiner's Amendment and pass the case to issue. Extensions of time under 37 CFR 1.136(a) will not be permitted since this application will be passed to issue.

The prosecution of this case is closed except for consideration of the above matter.

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Allowable Subject Matter

3. Claims 1-21, 29-46 and 48-68 are allowed.

4. The following is an examiner's statement of reasons for allowance: Regarding claim 1 (and claims dependent thereon): The prior art of record fails to teach or fairly suggest a method of processing a sheet-like glass substrate, the sheet-like glass substrate having a top major surface and an opposite, bottom major surface, as claimed. Specifically, the prior art of record fails to teach the method comprising: operating an ion gun to toward the bottom major surface of the substrate, said operation of the ion gun being performed to treat the bottom major surface of the substrate as the substrate travels a path of substrate travel so that the entire bottom major surface of the substrate will have been treated once travel of the substrate past the ion gun is complete to remove any oversprayed coating that was

inadvertently deposited upon marginal portions of the bottom major surface of the substrate during a previous operation of a downward coating apparatus.

5. Regarding claim 39 (and claims dependent thereon): The prior art of record fails to teach or fairly suggest a method of processing a sheet-like glass substrate, the sheet-like glass substrate having a top major surface and an opposite, bottom major surface, as claimed. Specifically, the prior art of record fails to teach the method comprising: operating an ion gun to toward the bottom major surface of the substrate, the ion beam comprising accelerated ions that strike the bottom major surface of the substrate as the substrate travels a path of substrate travel so that the entire bottom major surface of the substrate will have been treated once travel of the substrate past the ion gun is complete.

6. Claims 48 and 49 (and claims dependent thereon) are allowable for the reasons provided in the office action mailed 21 July 2006.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
